Divina Melange 2

"Melange upholstery in neon colours."

Divina Melange has been extremely well received by the market. Following on from this success, we are now adding additional colourways.

Divina Melange is a textile characterised by its lack of texture and nap and consequently the fabric accentuates the dimensions of the furniture, giving prominence to the colours.

Melange means mixture. The existing six grey and beige colourways are produced by mixing varying proportions of either black or brown wool with white wool. The different colours of wool are mixed before the garment is spun.

The new colourways have come about by dipping the two base colours in bold, virtually luminous pigments. The result is 18 coloured melanges.
